

MAX PLANCK LAW

#FUTUREOFLAW

#FUTUREOFLAW BARCAMP

Thursday, 2 November 2023, 1 p.m. – 6 p.m.

Max Planck Institute for Comparative and International
Private Law, Mittelweg 187, 20148 Hamburg

What effects have technology and digitalization had on the law? Is artificial intelligence really a “game changer”? If so, does that apply to law as well? What legal issues are raised by the climate crisis? And why is it urgent that we should speak about decolonization of law and discuss the perspectives of the “global south”? Join researchers from the Max Planck Law network to discuss these current and future challenges for legal studies at the #FUTUREOFLAW BarCamp. Seize the day and get to know the researchers from our network. We look forward to meeting and engaging with you.

The #FUTUREOFLAW BarCamp is intended for undergraduate and graduate students located in and around Hamburg who are studying law or a law-adjacent field. We plan to have you join researchers from the Max Planck Law network for a discussion of tomorrow’s important topics and for an introduction to some of the research currently underway at the Max Planck Society’s various institutes for legal studies. Jörg Weiss, a veteran BarCamp moderator with the science communication agency con gressa, will guide you into the format. We can’t wait to meet you.

Max Planck Law

Max Planck Law is a network of ten Max Planck Institutes engaged in legal research, one of which is the Max Planck Institute for Comparative and International Private Law. Alongside performing foundational legal research, the participating institutes share an intra- and interdisciplinary approach that focuses on comparative and transnational inquiry. Collectively, we offer the world’s largest program for PhD candidates and postdoctoral researchers working in the field of law. For further information, please visit www.law.mpg.de
